Airport Construction Is Steadily Progressing

Will Be Important Link in Trans-Canada Mail and Passenger Service

Air-Liners Will Use Crows Nest Pass to Connect Europe With the Orient, States Postal Official--Five Days Trip From Europe to Japan is Forecast

COLEMAN Airport, officially known in the Department of National Defence records as Project 58, was first proposed as a link in the Trans Canada air route by A. D. McLean, inspector of Airports and Airways, of Ottawa. His attention was first attracted through the small emergency field on Wylie Godfrey's farm, laid out by Forest Ranger J. H. Boulton and H. T. Halliwell, president of the Board of Trade. The first machine to land was a patrol plane of the Forestry Service, Pilot Jenkins giving a demonstration before several hundred people, the schools being given a half holiday in honor of the occasion.

In August of 1930, as district inspector of Airways, with headquarters at Regina, Mr. McLean, with military engineers of M. D. 13 made a survey of sites for landing fields through the Rocky Mountain section. The emergency field was not sufficiently large for heavy planes, such as would be used in mail and passenger service.

The site finally selected is two miles west of Coleman and eight miles from the summit of the Crows Nest Pass, inter provincial boundary of British Columbia and Alberta, and its altitude is approximately 4400 feet. It is a beautiful scenic location with a clear view in bold outline of Crows Nest mountain, mighty "Sentinel of the Pass" immediately to the north; the Sentry range on the south, and the main range of the Rockies looming up to the west. 18 miles eastward the horizon is bounded by the Livingstone range, outpost of the Rockies overlooking the foothills and prairies. Crows Nest river skirts the field, and the construction camp is built close to the river, with accommodation for the staff and 115 men, under Capt. W. R. Coats.

Work on the field serves to emphasize the reason these mountains were termed "The Rockies." Thousands of tons of rock have been piled from the surface, and even at six feet depth they are as thick as on the surface. Removal of rock leaves so many holes and depressions that considerable re surfacing and filling is required, and work on the project will take much longer than first estimated. Plans provide for an ultimate length of 4,000 feet runway east and west, and width of 600 feet, prevailing winds in the Crows Nest Pass being from the west. Seldom is there a wind from north or south. Sufficient land will be

prepared to land planes this fall, it is anticipated. During the winter work will probably be suspended, owing to frost and construction difficulties and the heavy winds which tear through the Pass.

Average flying altitude for light planes travelling this region is 7,000 feet, but larger planes on through trips to the coast are often seen flying at 10,000 feet, for mountains in this area range from 8,000 to 10,000 feet altitude. Captain Hawks in his flight last summer from Vancouver eastward flew at 12,000 feet over the Rockies, passing just south of Coleman.

Clouds are a constant menace to mountain flying, and add greatly to the risks in this area. Occasionally planes have been compelled to land here rather than risk crossing the Divide. Rutledge of Calgary being delayed four days here at one time rather than risk the crossing, for with dense clouds a flyer's risks are much greater than in flying over the prairies. Even the railroad track at times cannot be discerned from a low altitude, but in clear weather planes are seen quite frequently at high altitudes winging their way above the peaks, the Consolidated Mining & Smelting Co. machines being frequent users of this route.

Weather reports are furnished from the airport twice daily to the Dominion meteorological bureau, Fred A. Davis, a former army captain, being in charge. The port will be an important link in the Trans Canada route, and later developments of this section of the route will include erection of beacon lights to aid night flying.

Junior Football Team

Coleman's junior football team are coming along nicely, and are already counting on meeting the senior team before the season is over. They have played the men of the airport camp, and in the last game noted out by one goal, after holding the score even—3-3 at half time.

On the team are the following: Lawrence Ford, Bob Emmerson, Foss Boulton, J. D'Appolonia, Roy Beddington, J. Jenkins, Monto Ferrano, Douglas Moore, J. Booth, Ronald Jackson, David Smith.

The way those boys squirm around the older players makes the latter look to their laurels, for what the juniors lack in weight they make up for in speed.

Coleman Trims Blairmore Canucks

Coleman Red Sox defeated Blairmore Canucks on Friday evening 8-1.

Paul Yagoe pitched no-hit ball till the ninth inning when Gusti singled. An error by Joyce in attempting to catch a fly ball hit by Kemp scored Gusti, robbing Yagoe of a shut out.

Coleman: Yagoe, Richards, Blairmore: Houghton, Herman Van Duren.

ST. ALBAN'S CHURCH NOTES

Next Sunday is the seventh after Trinity. The service will be at 7 p. m., following which there will be a meeting of the Vestry.

A Beautiful Spot

The peaceful charm of McBain's lake draws many visitors from southern Alberta and eastern British Columbia. The Canadian Legion club house and beach is the popular rendezvous for casual visitors, where tents and equipment may be rented as well as rowboats and a motor launch, while a mile west are a number of private cottages owned by Fernie people, also cottages for renting owned by Mrs. Rosen, who has a sub post office from Jaffray, the nearest railroad station. The resort is 32 miles from Fernie, over the beautiful scenic highway along side the Elk River, the drive being an enjoyable experience.

Coleman and Blairmore Girl Guides are camped near the Canadian Legion club house and are having a splendid time during their ten days camp, which terminates tomorrow, (Friday.)

On Monday afternoon a number were undergoing their swimming tests, and all are showing the benefits of the healthy recreation and regular habits of camp life under capable supervision. And as they remarked, the meals are "swell," and all cheerfully take their turns in the various camp duties. If the girls had their choice, doubtless they would like to lengthen their stay for the balance of the mid-summer school vacation.

Music Examinations

The London College of Music examinations were held in Coleman on June 28, the examiner being Ernest E. Vinen, mus. lac.

The pupils of W. J. Harris taking part were: Owen Jones, John Nanson, David Jones, H. LeRoy, Albert Horrocks. These pupils made exceptionally high marks, John Nanson especially making a mark of ninety-eight out of a possible hundred.

J. Nanson has taken part in all the musical festivals in the Pass and other points and has been successful in gaining first place in his class in every one.

Parents Express Appreciation

Parents of Girl Guides have asked The Journal to express their appreciation and thanks to Mrs. R. P. Borden, district commissioner; Miss A. Yuill, captain; and Mrs. C. Devine, lieutenant, and Mrs. J. Devine, camp nurse, for their supervision of the girls during their stay in camp at McBain's lake. The Guides also join in their tribute of thanks for the kindly interest of the officers in arranging for a delightful camping period.

May Stock Lee Lake

Tests are being made at Lee Lake states Mrs. Parker, owner of the resort there, whereby it will be determined by officials of the government fisheries if it will be advisable to stock the lake with certain species of fish for fishing.

20 members of Fernie golf club were the guests of Crows Nest Pass Golf and Country Club on Sunday in inter-club games, when the home players gained quite an advantage over the visitors. Inter-club games have now been played since the season opened with Henderson Park club of Lethbridge, Pincher Creek Macleod and Fernie. Lethbridge Golf and Country Club have yet to visit the local club.

Local News

Miss Madeline Chardon of Blairmore is in Calgary taking a three weeks course under Norman Wilkie.

Mr and Mrs J. A. McDonald visited the Guides camp at McBain's lake on Tuesday.

Miss Isobel Atkinson returned on Tuesday evening from McBain's lake, where she had been with the Girl Guides camp.

Coleman people leaving for the Stampede this morning were: Mr and Mrs J. Russell, Mrs. W. Milley and son, Mrs. A. Beveridge and daughter, Joe Rinaldi and party.

Mr. and Mrs. Charley Higgins motoring from Montana through the Rockies, called on Frank Graham, sr., on Wednesday. They are former residents of Coleman.

Walter (Junior) Dibble is spending ten days holidays in Calgary. Writing home to his mother, he told of the delights of the big parade at the Stampede.

John Gray, of Graham's barber shop, was called to Drumheller owing to his brother having met with an accident, of which no particulars were given in the message.

The members of the girls First Aid team examined last week by Cal J. G. Clarke, director of St. John Ambulance Association, Ottawa, were Wilma Halliwell, captain; Joanna Finn, Nora McLeod Kathleen Hoyle, Vivian McLeod. They were entered as the C. G. I. T. team.

Tennis Tournament Close Featured by Mrs. Aut. Wilson of Lethbridge Defeating Margaret McDonald of Coleman

Coleman tennis club completed one of their most successful tournaments ever staged on the local courts on Sunday, when games postponed from July 2 were played to a finish.

The feature match of the day was the ladies singles between Margaret McDonald and Mrs. Wilson. The latter winning out in three hard fought sets. Mrs. Wilson ran up a two game lead in the first set and held it till the score stood 5-3 when Margaret staged a magnificent rally to take four straight games for the set. The second set was bitterly fought, Mrs. Wilson finally winning 6-4. In the third set Margaret fell away before the smashing kills and powerful drives of her opponent to go down 6-2.

Balloch had it rather easy in the men's singles. In the semi final he defeated Kwansey 6-1, 6-0 and went on to win the final against R. Shone, 6-1, 6-0, 6-3. This is Balloch's fourth Crows Nest title.

The ladies doubles was anybody's game till the last ball was played. Short and Ferguson won the first set 6-3, and gained a lead of 4-1 in the second set when Lindoe and McDonald put on a rally to tie the set at 4-4 and went on to win 7-5. In the third and final set Short and Ferguson ran up a 6-0 lead when again Lindoe and McDonald started a rally to take four games straight. Short and Ferguson finally breaking through Lindoe's service in the

tenth game to secure a victory 6-4. In the mixed doubles Jenkins and Short proved themselves too good for Kwansey and Ferguson and took the title 6-3, 6-1. Jenkins was in rare form and ably supported by his partner had the game in hand throughout the entire match.

The men's doubles went to Shone and Jenkins by default owing to Muir of Lethbridge having been called to Edmonton on business.

Final Results
Men's Singles
Semi-final: Balloch beat Kwansey 6-1, 6-0.
Final: Balloch beat Shone 6-1, 6-0, 6-3.

Ladies Singles
Wilson beat McDonald 6-8, 6-4, 6-2.

Ladies Doubles
Short and Ferguson beat Lindoe and McDonald 6-3, 5-7, 6-4.

Mixed Doubles
Jenkins and Short beat Kwansey and Ferguson 6-3, 6-1.

Men's Doubles
Shone and Jenkins beat Bells and Muir (default).

At the conclusion of play H. S. White, of Lethbridge, was called upon to present the prizes. At this time Mr. White proved himself a speaker of no mean ability and brought smiles to the faces of the spectators at his humorous sallies during the presentation. (Continued on Back Page.)

Quality Groceries	Ed. Ledieu Phone 232 "The Big Corner Store" Phone 232	Fresh and Smoked Meats

Jaffray P.O., British Columbia

Date For The Next Federal Election Is Still Uncertain

Ottawa.—A week after prorogation of parliament, the date of the next federal election was just as uncertain as it was when the house was in session. Liberal members left Ottawa with the prediction of their leader, Rt. Hon. Mackenzie King, that there would be an election next fall, ringing in their ears. There was no official announcement from the government side, and there was nothing apparent to lend strength to Mr. King's assertion.

A record-breaking program of legislation to be set in operation measures which would, if successfully administered, benefit in some way or other practically every person in Canada, the government has every reason to stay on long enough to reap whatever advantage might accrue. But there are four more elections to be held within the next six months or so, possibly five, and it is expected that if they should go against the government a general election would ensue.

All the vacancies are in Ontario, two in Toronto, one in Ottawa, one in Addington and one in Elgin county. The Toronto seats were vacated by the deaths of Hon. E. B. Rychman, former minister of national revenue, and Herbert Lennox, members, respectively, for Toronto East and North York. Dr. W. A. R. Mackenzie King's death left a vacancy in Frontenac-Addington, and resignation of Mitchell Hepburn, premier-elect of Ontario, vacated West Elgin.

Hon. Peter Hienan, former minister of labor and Liberal member for Kenora-Rainy River, is expected to resign almost at once to join Mr. Hepburn's provincial government. Thus there would be three vacancies in what were Conservative seats in the last federal election, and two that were Liberal.

Soon after Prime Minister R. B. Bennett returns from his vacation trip to Calgary it is anticipated the Conservative party will get down to work on a complete Dominion organization with the naming of a general organizer the first step. Hon. R. J. Mackin, minister of justice, mentioned, has been prominently mentioned for the task but it is believed considerable pressure would be required to induce him to accept the appointment.

In the meantime the government departmental officers are going forward rapidly with the work of setting up the necessary organizations to implement the legislation adopted at the recent parliamentary session. Designs are being prepared for the new money which will be issued by the Central Bank of Canada, and stock is being prepared for market to secure the \$5,000,000 capital required for that institution. Selection of governing officials will offer a knotty problem.

Pleased With Decision
London.—Lord Londale, baron of sports, congratulated Tex Austin, promoter of the rodeo, on his victory produced in London, on his court victory against the Royal Society for the Prevention of Cruelty to Animals. The society had charged Austin with cruelty to steers used in the show.

Forty million gallons of ice cream were consumed in Great Britain last year.

Pension Plan For Workers

Committee Has Approved Canadian National's New Project

Montreal.—A joint committee of company officers and representatives of employees has approved a new pension plan for Canadian National Railway employees to take effect Jan. 1, 1935. It is announced in the Canadian National Railway magazine.

The new plan, which has a contributory provision in addition to providing basic and service pensions on retirement at 65 years, covers all employees of the company except those under the Inter-colonial railway and Prince Edward Island employees. The plan also covers the Grand Trunk superannuation and provident fund. Employees in the I.C.R. and P.E.I. funds are expected to be given the option of coming under the new plan.

Minimum basic subsistence pension will be granted to each employee solely at the expense of the company. This may be supplemented by joint contributions by the company and by the employee. An employee may contribute from one to 10 per cent. of his salary after 10 years' service. Up to and including 10 per cent. the company will match the employee's contribution.

The pension regulations are to be administered by a board of seven members, four of whom will represent the company and three the employees.

Starts Insurance Plan

Fund For Unemployed Being Tried Out In Wisconsin

Madison, Wis.—Wisconsin is watching progress of its latest social experiment—unemployment insurance. The compulsory law became effective July 1. Every Wisconsin employer who has given work to at least 10 persons for 18 weeks must make contributions to the insurance fund, and employers may submit voluntary plans which are approved by the industrial commission, may be used in place of the compulsory act.

Until the fund amounts to \$500 reserve per employee the premium under the act will be two per cent. of the payroll. When it amounts to \$75 but less than \$75 reserve the rate will be one per cent.; and when \$75 or more contributions will cease unless the employer desires to provide more adequate reserves for his men.

Protection Of London

Subways And Underground Railways Guarded Against Attacks

London.—Questioned in the House of Commons on German preparations for bacteriological and other methods of warfare described by Wickham Steed in "The Nineteenth Century Review", Lord President of the Council Stanley Baldwin made guarded replies.

"I have seen allegations to the effect in a published article," he said, "but they have been officially denied by the German government."

Mr. Baldwin said the protection of subways and underground railways as well as aerial defence of the capital were in the care of special departments.

BRITISH STATESWOMAN

History was made at Geneva recently—and by a woman. She is Mrs. Corbett Ashby, above, who was the lone representative of Britain at the General Commission of the Disarmament Conference. Never before has a woman been a great power's only delegate. While the Conference was discussing security, Mrs. Corbett Ashby declared that Great Britain could not take part in any security pacts outside her Locarno commitments.

Avoid Trade War

Great Britain And Germany Sign Agreement

London.—Great Britain and Germany avoided a trade war for at least six months by signing an agreement providing for the payment of interest on Dawes and Young loan bonds held by British subjects. The agreement extends six months from July 1, the day the German moratorium on all foreign obligations became effective.

Other long and medium term obligations held in Great Britain which are mostly commercial, will not be serviced during the moratorium, under the terms of the agreement. Germany agreed to deposit British currency in the Bank of England for payment of all coupons from Dawes and Young loan bonds. In return, Britain will not apply the new clearing house law under which the government would have been able to seize a portion of German commercial funds for the benefit of bondholders.

New Alberta Premier

Hon. R. G. Reid Succeeds Hon. J. E. Brownlee

Edmonton.—Member of the United Farmers of Alberta government since its formation in 1921, R. G. Reid, provincial treasurer and minister of lands and mines, has succeeded Hon. J. E. Brownlee as premier of Alberta.

Mr. Brownlee's retirement from the premiership carried with it resignation of his entire cabinet, and Mr. Reid indicated his new cabinet would be built around the old. Mr. Reid will bring to the premier's office an alert knowledge of many government departments. At present he is provincial treasurer and minister of lands and mines. Previously he held portfolios of municipal affairs and health.

Historic Chesterfield House

London.—A room out of historic Chesterfield House, until recently the home of the Earl of Chesterfield and his wife, the Princess Royal, will be bought by an American motion picture firm and transported intact to the United States as a setting for stately scenes of English life, the Daily Telegraph reported.

Silver Cargo

Shipment Valued At \$405,000 Consigned To New York

Vancouver.—A shipment of silver, valued at \$405,000, which has been testering between Shanghai and New York, had been definitely consigned to New York and was being loaded here on board the freighter Pacific Shipper for forwarding via the Panama canal.

The shipment arrived here June 20 on the Tora, of Japan and was presumed in local circles to be the one referred to by Secretary Henry Morgenthau of the United States treasury when he declared the sudden dumping down of the silver export embargo in that country was due to information that international speculators were making large shipments to indefinite foreign destinations. He cited one shipment labelled "Shanghai to Vancouver and return."

Will Not Change Policies

Japanese Foreign Policies Will Not Undergo Radical Change

Tokyo.—Assurance that Japan's fundamental naval, military and foreign policies will not undergo radical changes were given in official quarters as newly appointed Premier Admiral Keisuke Okada sought to construct his cabinet.

Koki Hirota accepted reappointment as foreign minister. There were also assurances that two ministers of the old Saito cabinet, General Hayashi of the war department, and Mino Osamuni, minister of marine, will be continued in their posts in the new cabinet. The vernacular newspapers stated that naval leaders were displeased with the selection of Okada as premier. They regard him lukewarm to many of their policies.

"Dalworth" Due In August

Will Sail From England For Churchill July 28

Regina.—The pilot will hail the freighter "Dalworth", of the Dalgleish line, about August 13 when she comes into the icy waters of Churchill, Manitoba, to unload cargo from Europe and to take on Canadian merchandise and grain for the return.

Posters state that the "Dalworth" will sail from River Tyne, England, ports July 28 and from Antwerp, Belgium, July 28.

The "Dalworth" is expected to be the first ship into Churchill this year. If cargoes are offered other Dalgleish line freighters will call.

Storm Causes Damage

Terrific Wind Carried House More Than A Mile

Troqueville Falls, Ont.—Reports reaching here said a terrific windstorm that struck the settlement of Noranburg carried a house more than a mile and lifted three men 25 feet in the air.

A steel transmission tower, carrying power for the Abitibi Power and Paper company, was twisted and torn. The line was put out of commission. None of the three men who were carried aloft by force of the wind was badly hurt.

Arrest Doukhoubo Women

Victoria.—Two Doukhoubo women, who were reported to have disrobed and walked along the highway near Nelson, B.C., for a distance of three miles, have been arrested by British Columbia police, it was reported by wireless to headquarters here.

Commission Will Probe Hydro Charges At Hon. Meighen's Request

Ottawa.—Charges against Rt. Hon. Arthur Meighen, government leader of the senate, with respect to his activities as member of the Ontario Hydro-Electric Company, will be investigated by Rt. Hon. Sir Lyman P. Duff, chief justice of Canada. It was announced here that the investigation will be carried out at the request of Mr. Meighen himself, who has declared that if the charges were correct he should not continue as a member of the government of Canada.

As a government leader in the senate, Mr. Meighen, twice prime minister of Canada, is a member of the government without portfolio. Prime Minister R. B. Bennett officially announced appointment of the commission.

Last winter, during the session of the Ontario legislature, charges were made that members of the provincial government had profited by the government's action with respect to the Abitibi canyon power development. Mr. Meighen's name was also mentioned. The charges were revived during the recent provincial election campaign.

Mr. Bennett issued the following statement announcing appointment of the commission:

For some months the Right Hon. Arthur Meighen, government leader in the senate, has pressed for the appointment of a royal commission

to investigate charges made against him in his capacity as commissioner of the Hydro-Electric Power Company of Ontario.

Mr. Meighen submitted that if he were guilty of the charges made against him he should not continue to be a member of the government of Canada.

Recently, in view of the reiteration of the same charges against Mr. Meighen, during the electoral campaign in the province of Ontario, he has again alleged that inasmuch as the charges so publicly made would prejudicially affect his honor and integrity as a public man, he is entitled to have these charges investigated by a royal commission.

In view of the large and important part which Mr. Meighen has taken in the public life of Canada, and the fact that these charges were made by the premier-elect of Ontario and by another whom he described as his "chief lieutenant", it has been decided to appoint the Rt. Hon. Lyman P. Duff, chief justice of Canada, as the commission under the Inquiries Act, to investigate and report whether or not such charges are substantiated and provision has also been made that any other collateral charges made against Mr. Meighen may be referred by order-in-council to the same commission for investigation and report. The inquiry will be held at the earliest possible date.

Arrests At Flin Flon

Members Of Canadian Labor Defence League Charged With Intimidation

Flin Flon, Man.—Mabel Mallove, 23-year-old secretary of the Canadian Labor Defence League, at Winnipeg, was arrested here by Royal Canadian Mounted Police. She was charged with eight men and with intimidation in the three-week-old strike of mine workers which has paralyzed industry in this settlement.

Others arrested included Alvaro Grove, Nils Lundin, Mike Dendik, Fred Varbar and C. Ross. Louis Phillips was charged with obstructing police. Anker Peterson and Arthur Marshall were released on bail.

Resumption of operations at the plant of the Hudson Bay Mining and Smelting Company here was seen in a proclamation issued by Mayor E. E. Foster, in which he said men wishing to return to work would be given protection of the law.

Automobile Exports

Canadian Cars Are Being Shipped To South Africa

Ottawa.—Some improvement has been noted in the export trade of Canadian automobiles to the United Kingdom recently and a very substantial improvement in the trade to South Africa, officials of the department of trade and commerce stated here. The development has been particularly noticeable during the past few weeks.

The demand from South Africa is due to the improved economic conditions in that country because of the high price of gold. The departmental advisers are that the entire shipping space immediately available has been contracted.

The reason Canadian cars are playing so important a part in the trade with South Africa is said to be based on understanding, between certain United States parent companies and Canadian subsidiaries giving the latter the South African market.

France Vigorously Denies Any Connection With Plot Against Hitler

Berlin.—France, through her ambassador here, formally and vigorously denied she was involved in the plot against Chancellor Adolf Hitler's government which was broken up by the weekend executions.

The denial was given out and it was stated a formal protest will be made to the German government after the Nazi press had accused the late General Kurt von Schleicher of having dealings with France.

The killing of Von Schleicher, who

in 1932 was chancellor for 58 days, was justified, the newspapers insisted, on the basis of "the heinous crime of entering into negotiations with France, thereby giving the idea to Paris that the Nazi system is not going to last."

French Ambassador Andre Francois-Poncet branded the charge an "absurd fable", and protested strongly against the "great prominence" given to the story by German newspapers.

Hitler had accused some of the plotters of negotiating with a "foreign power" and there was much speculation as to what country was meant.

The German newspapers' story accused Von Schleicher, one of those executed by Hitler's men, of having dealings with France while he was chancellor in 1932.

French Foreign Minister Louis Barthou was accused of revealing the Von Schleicher plot to the British at Geneva, May 30.

"Hitler's days are numbered," Barthou was reported as saying.

In addition to the French envoy, the British and American ambassadors have called at the foreign office.

Meanwhile, it was revealed by officials of the Nazi party that Chancellor Hitler's private army of 2,000 storm troopers, among whose leaders the shots of firing squads fell thickest, is doomed.

These officials confirmed reports that after the July vacations the place of storm troopers in German life will be greatly changed, indicating less than 20 per cent. of the men will be retained.

No Time To Be Lost In Implementing Measures Passed At Ottawa

Ottawa.—Cabinet council entered upon the task of building up the necessary machinery to carry out the involved proposals "authorized by legislation at the parliamentary session just closed. The set-up of the marketing legislation, the farm debt relief scheme and the central bank will all be matters of immediate consideration.

It is understood that establishment of a central bank will be delayed only so long as it takes to secure men with the necessary qualifications to head it.

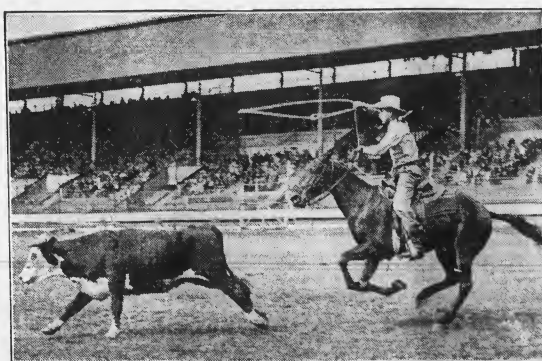

Undoubtedly the first governor will be imported from Great Britain since it has been made clear on more than one occasion that it would be extremely difficult, if not impossible to find a Canadian to fill the post.

It is possible, if a Canadian banker of the right type can be induced to head the new bank, he will be sent to London and other centres where central banks are in operation in order to study methods, so that the desire to keep the staff purely Canadian may be realized.

Numerous inquiries are pouring into the various departments with respect to the marketing and debt adjustment legislation and no time will be lost in implementing these measures, it was stated.

Prime Minister R. B. Bennett will depart for Calgary for a fortnight's absence. It is understood Rt. Hon. Sir George Pease will be acting prime minister during Mr. Bennett's absence.

LONDONERS FLOCK TO THE WHITE CITY TO SEE RODEO THRILLS

The famous White City, London, has been turned into a glorified round-up in which 100 cowboys and 15 cowgirls from Canada and the United States are playing prominent roles. The British promoter is staging a world's Rodeo Championship and above we see a competitor chasing a steer in the Breakaway Roping Contest.

NOTES AND COMMENTS

THE Holiday season in full swing, many are journeying hither and thither. The Rocky Mountain highways are travelled by motorists of all classes, eight-cylinder cars and humble flivvers of ancient vintage vying with each other to cover the greatest distance in the shortest time.

THESE hurrying parties escape the deep charm of the mountains. Scenic effects from highways give thrills, but the real joys which leave memories of delightful days are obtained by getting off the highways and enjoying the restful atmosphere of a lake or a stream where camping may be enjoyed undisturbed by flying dust-stirring automobiles and gasoline smells.

TOURIST trade, which some slow-witted business men do not consider worth while catering to, brings in much new business. Every party which stops and looks around, or stays over for a night's lodging, leaves cash. The more inviting a place, which can be greatly enhanced by small attentions and services which cost little but mean much in attracting people, the greater the chances of increasing revenue from the tourist travellers.

MAKE Main Street and every other street look its best. It is the bright, well-kept front street which is the shop-window of any town. There are hundreds of towns through which motorists pass, but it is only those which compel their attention by a pleasing appearance and a congenial atmosphere at which they stop for accommodation or to purchase supplies.

HON. R. G. REID, Alberta's new premier, assumes the premiership under difficult circumstances. Many feel an appeal to the electorate should follow the scandals which cabinet ministers of the U. F. A. government have brought on themselves. There has been vacillation in some of the governmental policies, and the U. F. A. party heads have played politics just as flagrantly as the Liberals or Conservatives. Evidence brought out at the Brownlee trial shows that even in routine office duties, there have been irregularities among the lower ranks of government officials, so that public confidence has received a jolt. Mr. Reid has been appointed premier in an effort to bolster up the U. F. A. party, because his record possibly is of the type that will make the most popular appeal. But no matter how popular a leader may be, or how skillful, he must cast off the incompetents if he is to succeed.

WHAT will Rocky Mountain constituency do? That is the question frequently asked by those who are interested in seeing that this district secure capable representation in the legislature. A compromise was effected in 1930 between Conservatives and Liberals by supporting George Cruickshank. If the ranks of Labor can produce a capable leader, he will possibly endeavor to secure the support of Liberals and Conservatives. The Radicals will probably nominate a candidate who will make lots of noise but whose efforts will result in nought, except dissension, as past experience indicates. It is not too early for men of varying shades of political opinion to give thought to selecting a candidate, and to build up their organizations so that they can be effective in an election campaign.

A 60-foot flagstaff has been erected in the garden plot at the town hall. Flag etiquette requires that on national and state holidays, the flag be hauled to the mast at sunrise or after, and hauled down just before sunset. It should not be left flying after the appointed time, for it loses its significance if so allowed. Besides, it's hard on flags in a heavy wind, therefore dignity and economy should compel attention to these details. But by all means have a flag worthy of the name; not a tattered rag, and above all see that flag etiquette is observed. The flag may be only a piece of colored cloth with an emblematical design, but as it floats aloft it carries inspiration for the maintenance of national ideals.

IN remodelling an old building, it is interesting to note how articles which have hung in one spot on the walls for years will remain there while the ancient building takes on a modern appearance. Over at the town hall, there is a row of firemen's caps and waterproof hats, purchased possibly 20 years ago, when Frank Graham, sr., was chief. Though changes have been made both outside and inside the building, that row of caps is still in the same old place, and they haven't been worn for years, except someone tried one out for curiosity. Likely they will remain till they fall to pieces or someone will root out all the junk that has accumulated.

ANOTHER place was the Italian building where cigarette and tobacco signs decorated one of the walls. The front of the building has been remodelled, a fine hall built above, the exterior beautifully stuccoed, change has been made all around, but the old signs bravely withstood the ravages of time and change and when last seen were in the same old place they had occupied for years. It just happened that work went on all around, while the old relics were left un-

disturbed, simply because they minded their own business, and attracted no particular attention, except the eye of the observant reporter, who is supposed to know everything, but usually doesn't. But even the mute appeal of those old relics attracts marked attention from the curious minded, whose mind travels over the years they have been there, and the many changes that have been made since they were placed on the walls.

The importance of a properly made up invoice or billhead cannot be overestimated. See that your stationery properly represents your business and leave your orders with The Journal. Envelopes carry your message to its destination. They are important, and this office can suggest attractive printing copy.

Five Million Miles at Less Than Half-cent a Mile.....

A PONTIAC Economy Record That Challenges Comparison

T. M. PATRY, managing director of U. & I. Auto Livery, Vancouver, states;

"The depression brought a huge cut in hire rates; I freely state that one of the chief reasons why this company was able to show a profit in the hard years since 1929 was that our rugged Pontiac cars gave service at such an extraordinarily low cost of operation per mile."

LOCAL AND GENERAL

Mr and Mrs Tom Bastian of Edmonton visited Mr. and Mrs. W. Lees, on their return from a motor trip to Hollywood.

Mrs. W. O. Bowers and daughter Mildred, of Edmonton, and Mrs. G. A. Tichborne, of Port Arthur, Ont., called on Mrs. Halliwell on Tuesday. They are on a motor tour to Portland and Vancouver.

The Haring Society's final race of the season for old birds will be held over the week end from Broadview, Sask., a air line distance of 541 miles. During the remainder of the season young birds only will be flown.

A party including Tom Holstead, Jerry Lonsbury, Bill Lonsbury, A. McIntosh, John McDonald, Ernie Houghton and Bob Morris went out to North Fork on Saturday evening for the week end, and had a fair catch of speckled trout. The upper reaches of the Ricehouse creek above Daisy creek have been closed to anglers.

Heavy smoke from British Columbia on Tuesday afternoon gave some concern over fires spreading into Alberta. During the evening the smoke disappeared, and the air was clear again on Wednesday morning. As the season advances, danger of fires increases, and great care must be exercised to all who travel through the forest.

The wedding of George H. Graham, youngest son of Frank G. and the late Mrs. Graham, and Miss Mary Haman, daughter of Mr. and Mrs. Haman of Natal, B. C., took place at the home of Mr. and Mrs. Charles Graham at Lacombe on Monday, July 9, Rev. A. D. Currie of Crossfield, formerly of Coleman, officiating. Following a visit to Edmonton and other places, they will return to Coleman. Several parties and showers were held in honor of the bride prior to her leaving for the wedding at Lacombe and they take up married life with hearty good wishes of many friends.

Benefits of Camp

Choice of a camp, especially for children, is important. Its educational and permanent values vary with organization and supervision. A good camp offers in most cases an answer to the question of whether a vacation is a profit or a loss. Vacation time is a time when children learn as well as play. The right kind of a camp means that they learn by doing and learn things worth learning.

Camping offers opportunities for recapturing eagerness, spontaneity, and a sense of adventure. It is an insurance policy against idleness, ennui and mischief. It is an investment in joy and education.

WORLD HAPPENINGS
BRIEFLY TOLD

Mme. Marie Curie, co-discoverer of radium, died July 4 in a sanatorium at Valence, France.

A trade accord between the United Kingdom and Estonia has been initiated and will be signed in a few days.

John C. Slater, one of Prince Albert's earliest school teachers, died at his farm home six miles east of the city, aged 81. He came from Galt, Ont.

Winnings from sweepstakes or lotteries will be forfeited to the crown under the bill amending the Criminal code which was given third reading in the House of Commons.

President Roosevelt has signed the legislation granting a partial six-year moratorium on paying off farm mortgages and the bill for a retirement pension system for railway employees.

The French destroyer *Vaquelin* will visit Canada during the summer to participate in the celebrations of the 400th anniversary of the arrival of Jacques Cartier in the St. Lawrence valley, it was announced.

The Pacific seaboard's first international air line is now in service with the extension of the United Air Lines San Diego-Seattle passenger-express route to Vancouver. Through connections at San Diego, the line links three countries: Mexico, the United States and Canada.

Formal opening at Peoria, Ill., of its \$5,000,000 distillery, the largest in the world, was announced by officials of Hiram Walker and Sons Company, Canadian distilling firm. The new plant will turn out 100,000 gallons of whisky a day and its daily grain consumption will be 20,000 bushels.

The U.S.S. *Wilmington*, warship, steamed into Toronto harbor, under command of Admiral Leahy, carrying the mace of Upper Canada parliament, seized by American forces during the wars of 1812. It was returned to the Ontario government as a mark of friendship between the two nations.

Recipes For This Week

(By Betty Barclay)

PICNIC SALAD

(Serves Six)

- Lettuce
8 cups orange pieces
3 deviled eggs
Stuffed olives

On lettuce covered salad plates arrange mounds of orange pieces. In each mound place half of a deviled egg which has been sliced lengthwise. Cut side should be up. Garnish with slices of stuffed olives. Serve with mayonnaise in lettuce cup at side of plate.

ORANGE CREAM CUSTARD

(Serves Six)

- Mix together thoroughly and cook in double boiler until thickened:
2 egg yolks, beaten
1/2 cup sugar
2 tablespoons flour
1/4 teaspoon salt
1 cup orange juice
1 cup cream (or evaporated milk)

Add:
1 teaspoon grated orange rind
Cool and turn into serving dish over:
1/2 cup orange slices

Chill. Cover with meringue made of:
2 egg whites, stiffly beaten with
4 tablespoons sugar
Decorate with additional orange slices

Brief Career For Society

National Anti-Scandal Idea Did Not Last Long

A brief obituary notice in the London *Times* tells of the death of an idea as well as of a man. A few years ago the Rev. Frank Melville, vicar of Exhall, founded the National Anti-Scandal Society, which almost immediately had a countrywide membership. Its members received a badge bearing a likeness of the three wise monkeys and the legend, "Speak no evil, see no evil, and hear no evil." At its most vigorous period the society's membership could be counted only in the hundreds, but it was made up of enthusiasts. Why did it dwindle away and come to nothing in just a few years? It is asked by a writer. The *Times* observes that Mr. Melville was "noted for his outspoken views and his humor."

The world's largest known copper deposit, in Chile, is estimated to contain 700,000,000 tons of ore.

New Zealand is void of snakes or poison insects.

PRETTY HOME FROCK THAT'S EASY TO SLIP INTO—IT OPENS OUT FLAT FOR IRONING

You couldn't ask for anything easier to fashion than to-day's pretty home frock. Delightfully cool and lovely for such a model is dimity print with crisp white organdie as the original. Have the ruffling finished professionally with picot edge, or you can roll it by hand or stitch it on the machine. A gray seersucker in checks or stripes is an excellent medium. Trim it with white pique. Cotton voile prints, crinkled crepe prints, batiste and handkerchief lawn prints are other lovely cool suggestions for this youthful model. Style No. 331 is designed for sizes 16, 18 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards of 36-inch material with 1/2 yard of 39-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

The Nerviest Insect

Thieving Cockroaches Give Trouble In New York Zoo

Dr. Raymond L. Ditmars, the great New York expert on snakes, has made the discovery that the cockroach is one of the boldest thieves in the animal kingdom. This nervy insect will eat the skin right off the biggest snake in any zoo. When the zoo snakes shed their skins, the keepers save them up for the natural history classes in the schools. Naturally they like to get these skins whole and in perfect condition. But because of audacious and voracious cockroaches the skins often look like something the moths have been at. But Ditmars has checkmated the thieving cockroaches by posting bullfrogs as sentries around the snake cages during the skin-shedding season. There isn't a cockroach in the world that is active and smart enough to get past a hungry bullfrog.—Toronto Star.

Praise For Canadian Nurses

And Are Well Known

A tribute was paid to Canadian nurses by Miss Edith Rome, interviewed at Montreal on her way to attend the Canadian Nursing Association convention in Toronto. Miss Rome said that Canadian nurses have a high reputation in Britain, where they have become known through the constantly increasing interchange of nurses.

The standards of nursing in Canada and Britain, Miss Rome remarked, are much higher than those of some countries of Europe, where nursing is a very new thing as yet. The proposed founding of a Florence Nightingale scholarship was referred to by Miss Rome, who expressed the hope that some Canadian nurses would compete for and win it.

Little Journeys In Science

PYRETHRUM

(By Gordon H. Guest, M.A.)

The story of how a young German scientist discovered a valuable insecticide is most interesting. In far away Japan, in the 17th century, a Japanese nobleman's daughter was being married, and to this celebration was invited a young German scientist.

It was the usual Japanese custom of those days to decorate each room entirely with one kind of flower or blossom. In one room the young scientist observed that no insects were flying around, and that the floor was strewn with dead flies, ants and other typical summer pests. This room was decorated with a flower, somewhat like our ordinary field daisy. The young German found that this flower was known as the pyrethrum and that it grew in abundance on his host's estate.

Permission was obtained to take a few of these flowers to his laboratory. After many experiments with pyrethrum and similar flowers, he discovered that the scent given off by them killed insects and other creeping pests, but was harmless to humans. His discovery has been of great value to all nations in the everlasting war against insect pests. To-day this little "field daisy" is widely cultivated in Japan, and its blossoms, compressed and packed in bales, are shipped to all parts of the world to be used in the manufacture of insect powder, which is used chiefly in the home.

About the most helpless thing on earth is an automobile seven miles from a filling station with its gasoline tank run dry.

A GOOD CATCH

Above we show a photo of Bill Hay, the famous angler of Amos. A tiny indie team, with a couple of "king fish", otherwise spring salmon, caught at Victoria, where Mr. and Mrs. Hay have been spending a most enjoyable holiday golfing, motoring, and above all, fishing.

Bureau Of Research Suggested

Okanagan Member Lays Plan Before B.C. Government

Creation of a provincial research institute for scientific investigation of modern and by product trends in all industry, and more particularly to develop outlets for the basic primary products of British Columbia, is being suggested to the provincial government at Victoria, B.C., by Dr. J. Allen Harris, M.L.A., South Okanagan, himself a research chemist.

Dr. Harris suggests that a modest start be made with the plan, to supplement what already is being done in the way of scientific research in B.C. industry. In accommodation at the University of British Columbia, without the expense of new building, he proposes that the province launch the nucleus of a provincial research institute, which would be wholly apart from student activities at the university.

Started in just such a way the Mellon Institute in the United States was quickly subsidized by private industries, and has since proved of supreme importance to the business life of that country.

CHARMING ENGLISH STAR IN HAPPY MOOD

Jane Baxter, English movie star, whose latest production, "Girls Please" has just been released, looks into the camera with a winsome smile. Of happy disposition, Jane has already won many movie fans to her banner and she should break into the headlines for a long time to come.

SUNDAY SCHOOL LESSON

JULY 15

GOD CARES FOR ELIJAH

Golden Text: "Your heavenly Father knoweth that ye have need of all these things." Matthew 6:32.
Lesson: 1. Kings 17:1-24; 19:1-8.
Devotional Reading: Psalm 23.

Explanations and Comments

Elijah Protests a Drought, 17:1. Elijah the Tishbite, that is, a native of Tishbe, a member of the tribe of Naphtali who dwelt for a time in Gilead, now appears. In 2 K. 1:8 he is described as a hairy man, girt with a girdle of leather about his loins. His name is composed of Eli, meaning my God, and Jah, the short form of Jehovah. "My God is Jehovah"—the name suits him. It grew out of his life recalling the faithless people from the false worship of Baal to the true worship of Jehovah the living God (Charles R. Brown). Ahab was the king at this time of whom it is said (1 K. 16:30) that "he did that which was evil in the sight of Jehovah above all that were before him." Elijah suddenly appeared before the king. "Ahab is the proud and fierce spirit of his day, absolute monarch, possessing the power of life and death. At his side is Jezebel, who is as much more ambitious than her husband as Lady Macbeth is more ambitious than Macbeth. The prophet stands before him. Does he? In point of fact, he is more conscious of standing before God. In the consciousness of God's presence is the prophet's sense of courage" (Allerton).

Elijah told Ahab that a long drought was coming upon the land as a punishment from God for his sins. See 1 Kings 16:32. "As Jehovah, the God of Israel, Jehovah, solemnly affirmed, making use of the customary form of an oath, 'before whom I stand,' whose servant I am, 'there shall not be dew nor rain these years.' Without dew or rain there could be no harvest. The hand of God was especially recognized in those days in the giving or withholding of the rain. The drought would be a long duration, and would cost only at his word, Elijah declared. See Jas. 5:17, 18.

Elijah Fed by Ravens at the Brook Cherith, 17:2-7. The word of Jehovah came unto Elijah, saying: "Thine enemies, the others, such as 'Thus saith Jehovah,' 'Jehovah spake,' occur two thousand times in the Old Testament. The phrases are familiar formulas of all the prophets, and express their sincere conviction that they are speaking or acting in accordance with the will of God as revealed to them through mental impulses or 'by divers portions and in divers manners.' 'Get thee hence'—to avoid the wrath of Ahab and Jezebel, for Ahab was seeking him everywhere. 1 K. 18:10, was the direction Elijah received, 'and hide by the brook Cherith east of the Jordan,' where there were convenient places for him to hide. 'I will make the ravens as my agents. 'All circumstances are the voice of God, commanding and training' (Alexander MacLaren). Those who have watched the habits of large birds bear witness to the large supply which they bring to their nests.

Did Elijah kill and eat the ravens, did he claim some of their prey for his own sustenance? Some scholars think that instead of ravens we should change a single vowel in the Hebrew and have the Hebrew word for Arabs, and others explain that merchants are meant. Whether the writer of the stories about Elijah intended the statements which read like miracles to be understood literally, or as poetical, pictorial statements of facts, each one must judge for himself.

Japan's New Submarine

The Japanese Navy's new submarine, the 170, has been launched. The new vessel has a displacement of 1,635 tons. Its engines of 6,000 horsepower will propel it at a surface speed of nineteen knots. Before the launching of the 170 Japan's submarine tonnage was given as \$7,294, well over the \$2,700 ton limit imposed by the London naval treaty.

Small But Effective

The parliament of the Isle of Man has just brought down its budget showing a surplus of \$320,000 where only \$25,000 had been estimated. The practical result is a reduction of the income tax rate from ten pence on the pound to eight pence.

Courtdish consists of a man running after a girl until she catches him.

About 2,000,000 tons of water pass over Niagara Falls every minute.

Agricultural Notes

Many Items Of Interest To The Western Farmer

The Canada thistle is not native to Canada. It was introduced originally from Europe.

All forms of nitrogenous manure increase the growth of grass at the expense of clover.

Nitrogen, while stimulating plant growth, soon loses its power unless fortified sufficiently with phosphorus and potash, particularly the former.

Losses of fertility from farm manures may be prevented by the use of litter, watertight floors, covered manure pits, and by getting the litter into the land as quickly as possible.

In relation to grassland, its creation, management, and fertilization, efficient and highly systematized research has done much during the past few years to add to human knowledge and to the profits of the pastoralist.

The use of seaweed as a fertilizer dates back to historic times, and its value for the upkeep of soil fertility has been generally and practically recognized both in the old world and in the new by farmers reading not too far distant from the coast line.

One hundred and eleven pounds of bromine grass seed and four pounds of rhuibar seed from the British Isles, and 122 pounds of flax and seven pounds of rhuibar seed from the United States were imported into Canada during the year ended June 1, 1924.

Sheep help to suppress the wild carrot in pasture lands. This weed is best kept in check by the regular rotation of crops with thorough cultivation. It is spreading in the clover seed producing districts of Ontario, and is a nuisance in long roadsides, waste places and old meadows.

Agricultural research has demonstrated that young herbage, besides being a rich storehouse of proteins, sugars, starches, and essential minerals, contains carotene which in the form of a natural producer vitamin A. This vitamin promotes growth in farm stock as well as in human beings, and enables them to resist disease.

"I know precisely that for either object, whether to bring the weeds and quick grass to the surface and to wither them by scorching heat, or to expose the earth itself to the sun's baking rays, there can be nothing better than to plough the soil up with a pair of oxen during midday in summer.—Xenophon in his book 'The Economist', 434-335 B.C.

There is a final source of economy which is essential to the rapid, confident, and accurate extension of scientific research, and consequently to industrial prosperity, based upon its practical application, and that is sympathetic co-operation and loyal team-work between research workers themselves, whether they belong to the same or different institutions or organizations.—Lord Bledisloe.

Britain's Public Men

Versatility Is Quality That Makes Them Successful

Britain is truly blessed in the character of her public men, in her ambassadors and representatives abroad. Sir William Clark was not merely a trained civil servant with a grasp of trade and economics. He was a cultured man of the world with a civilized mind, one who was as much at home and as happy in discussing the poets as in analyzing the latest statistics on the export of lumber. That quality, the quality of many-sidedness, of versatility—it is the English conception of education—appears to be the thing which makes the Englishman so successful.

Sir William Clark goes to South Africa, will occupy there the post that he held here. In that great field of duty and responsibility Canadians will wish for him all the success and prosperity his talents can hardly fail to win.—Ottawa Journal.

The new railway depot at Kenton, Middlesex, England, is built of brightly-colored enameled metal. Stainless steel figures largely in the fittings and the platform is flood-lighted.

RIT COLOR STAYS IN

Now you can color lingerie, shirts, slip covers, etc., and know that the color will STAY. The new Rit color is the only one that never has streaks and spots—and why? Rit colors last and last and last—43 colors.

YOU'LL HAVE "BETTER LUCK" WITH

NEW!
No longer a soap!
Dissolves instantly.

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry before deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for the scholarship abroad and Camilla is the aristocratic daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of finding an agency job. Others in the story are Avis Wether, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's maid, and Gus Mollison, his former room-mate with whom he has quarrelled. After a party to celebrate Peter's return, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip out to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along before he leaves and they are married. Camilla has gone from the studio. Avis Wether calls on Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Fager Youth," and Avis "Insatiation." Peter adopts the latter title and Camilla, heartily, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disclosure, hurries and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he has sculptured especially for her as a wedding gift. They named it "Land of Hope."

(Now Go On With The Story)

CHAPTER LI

Avis managed to visit the exhibition with John Danforth on the day before the final vote would be cast for the winner of the Paris scholarship. She had made the coincidence seem casual enough. Her interest in art had elicited her uncle's unqualified approval from the beginning. His own sons and only daughter had evinced none of his aesthetic appreciation, which was one of the few disappointments of his life. So, when his niece not only patronized the profession, but actually won her degree at National, he was immensely proud, and sympathetic with her plans and interests.

So generous was his measure of approval that he had purchased one of her best paintings and hung it in his library, though he had to admit to himself that she couldn't have sold it elsewhere for a song. But he advocated that praise stimulates effort and encourages ambition.

He was particularly noted for his philanthropy to talent, and not a small part of the Paris scholarship fund was responsible to his generosity; but he never permitted his left hand to suspect what kept his right hand so busy.

"The judges have no easy task. I can tell you that," he confided to Avis at the exhibit. "It was difficult even to eliminate." "It was difficult to do only beauty and perfection of detail enter into the consideration?" she asked, seriously.

IN UP-TO-DATE STABLES

—Old Reliable Minard's—

When horses come in to stable with wire-cord or saddle bolts, or crows have cut either, the thing to do is get the Minard's knot at once, as Mr. David S. Glasgow, Manitoba, knows. He writes: "I like your Minard's knot. Like to have it in the house. I have found your Minard's Liniment especially good for rubbed wire on a horse's leg." A family doctor prepared Minard's Liniment over 60 years ago. Still invaluable in every stable and every house.

W. N. O. 2054

"Oh no, there are many points to be considered." "Such as—"

"Subject matter, position, execution of material—"

"Indeed it means a very great deal. Is there a place here in which you vision a purpose, a story?"

"Oh, yes, a splendid one, Uncle John. You mean that I look at that group over there, third from the end. Doesn't it tell you a dramatic story?"

"Yes. I remember it well in the original selection. There was no question about entering it. I recall. Undoubtedly, it is one of the best. But there are so many among the best."

"But what other one tells so poignant a story of life?" she insisted. "There is the seagull—beautiful, but—just a seagull; a splendid likeness of Andros Havelock—after all, just the portrait of a man; those nude figures titled 'Love,' about which there is nothing individual; the boy on a hill in a storm, the modernistic conception of 'The Kiss'—but who would want a kiss like that?" she smiled.

"I suspect," he looked at her shrewdly, "that you are campaigning for a vote for that young man of yours." "Only because he deserves it," Avis defended. "I don't doubt that," he agreed, readily. "Well, dear, if I will let you see your anxiety and you will keep the secret to yourself, he already had my vote from the beginning. I might say that my opinion could have wavered between that and the Havelock portrait, but since there had to be some dividing factor, you will let me in Peter Anson might as well be it. I see nothing unethical about that. It is merely a matter of matching points, and, as you say, the vision and the story behind that group of immigrants should be favored. But don't hope too much. My vote is only one of seven, you know." "I am glad to know that Peter will have one vote, anyway. That will draw attention to his work, at least. And you might be able to influence a good sale for him," she suggested, coquettishly.

"Perhaps I can," he agreed, with an amused smile.

Meanwhile, the results on Camilla's work were progressing rapidly. Wheatheart Cereal sales had doubled within a fortnight, production was speeded up, the company was one of the few in the city calling back its former employees. Negotiations were being made with a national radio network to broadcast a Tiny Tot series for a children's half-hour program. Consultations, plans, discussions, were in order.

Camilla was the central figure. Her brain whirled with the exhilaration of so much attention and approbation, even while it functioned calmly and clearly with the execution of her plans. Finally, it was decided that she should prepare the stories, being the only person familiar with the characteristics and activities of her diminutive people. Her salary would be doubled and an additional sum paid for each story. These would be comparatively easy for her to produce, because they would follow the same action as appeared in the advertisements. The work would involve only a little more time, which she could now spare from her drawing board, and her remuneration would be doubled thereby.

Then, the most astonishing development of all was presented to her. The radio manager insisted that the obvious person to present the Tiny Tots, by all, to the juvenile audience, was the author herself, Camilla Anson.

Camilla protested, overwhelmed by the possibility. "But I can't do everything," she objected, bewildered. "How can I do copy, write manuscripts and broadcast two days each week?"

"It is a pretty large order, but you can do it," the advertising manager encouraged. "You will have a secretary to attend to everything except your most personal work, and the broadcasting after the first few experiences will become very natural to you. We can arrange for the national hook-up where here instead of from the New York studios—"

So it was arranged, and Camilla returned to her apartment that evening so thrilled and bewildered and delighted that she couldn't decide whether to laugh or cry. She summoned Peter, and, secure in his arms, tried each outlet of her emotions.

He held her close, scarcely believing with his ears heard; that his Camilla had become a national figure in her field, almost over night. He

had recognized her talent from the beginning, but to have the world recognize her so quickly was a revelation and an enigma at the time. "Why, precious!" he exclaimed, holding her off to gaze into her flushed face. "I shan't be able to afford a wife like you any longer." "Peter, don't say that!" she laughed happily. "None of it would be any good at all, without you. And if you mean that I shan't—"

She met his eyes bravely. "I do, Peter." He drew her again into his embrace. "My darling, how could I deny you the right to take such an opportunity when I can't take care of you? Some day, perhaps, his arms relaxed about her and his words became impatient. "Oh, I don't know. I've always talked about what I am going to do, while you have kept quiet—and done it!"

That old expression of hauntingly beautiful and charmingly fastidious and the monster of jealousy gripped indolently at his heart. He tried valiantly to shake it off, but his blood was tenacious. He sank into a chair, listlessly.

Camilla was on her knees beside him, instantly, as if she had heard widening chasm in desperation. Her arms clung to him. "Peter, dear Peter, tell me you don't want me to go on with this! Tell me the truth!" she pleaded. "I want to do just what you wish for me, what your love will let me do. I don't want to obey anyone or have anything except you and your love."

He was instantly contrite, tender. "Why, if I could plan your life for you, I couldn't wish it to be more perfect. You don't think I'd be a dog in the manger, do you?" "I don't think so," she said, with a tremulous attempt at mirth. "I guess I'm just so proud of you and glad for you that I don't know how to act—don't know what I'm doing."

"Are you sure?" anxiously. "Why, of course. Tell you what every day you broadcast, I'll tune in and get more inspiration from hearing your voice while it speaks to the whole nation than I could get a dozen other ways. I'll say to myself, 'That's your wife, you worthy pup. She did that all by herself and in no time. Get yourself to work and to deserve her!'"

With such gay jesting and repeated assurances, he convinced her of his approval, with this reservation, "Of course, if that day ever comes when I can match your salary, Mrs. Anson, you will be expected to meet the cost of our original agreement."

"That day can't be too soon for me," she declared, earnestly.

(To Be Continued)

Fight Gas With Gas

France Has Devised Defences Against Enemy Assaults

France is prepared to fight gas with gas and has devised defences against enemy assaults on whole cities by disease germs, military officials revealed.

A newly-developed defensive gas effectively neutralized poison gases which might be dropped on centres of population in air raids, it was said. Another gas, it was explained, would kill microbes released over a city.

Prepared to invoke these new defences, military authorities said they were "not alarmed" by disclosures in London that Germany allegedly has studied the feasibility of flooding London and Paris subway systems with gas and germs.

Marvels Of The Heavens

Astronomer Gives Some Idea Of Age Of Sky

Sir James Jeans, the astronomer, unfolded some marvels of the heavens in a lecture at the Royal Institution recently. Here are some of them: Altogether there are 100 million stars. They are scattered round in the shape of a gigantic cartwheel. This wheel of worlds goes round with majestic swiftness. Each revolution takes 250,000,000 years. During the whole of the civilized epoch the wheel of worlds has only moved as much as the hour hand of a clock moves in one second. Yes—and this will give you some idea of how old the skies are—the wheel of worlds shows evidence of having gone round thousands of times.

On the first of May this year frozen poultry holdings in Canada were some 2½ million pounds in excess of the previous year, but by June export trade is largely responsible for reducing the stock.

The approximate periods of incubation of several species of domestic fowl are: Hen, 21 days; partridge, 24 days; guinea fowl and pheasant, 25 days; duck, peewee, and turkey, 28 days; and ostrich, 42 days.

MATURITY—MATERNITY MIDDLE AGE

At these three critical periods a woman needs a medicine which depends on "The why so many take Lydia E. Pinkham's Vegetable Compound, 98 out of 100 say, 'It helps me!'" Let it help you, too.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

The New Diana

Fast Mail "Plane Of Imperial Airways Well Named"

Endurance feats like those of Mrs. Mollison and Miss Jean Batten will soon cease to have any good excuse. When Miss Amy Johnson flew to Australia in twenty days the regular air line ended at Karachi, and she was continuing along a route where no woman had flown before. Mrs. Batten, taking the same trail in the same type of aeroplane, also had some reason for enduring the strain of long days alone in the air. She had not seen her father in New Zealand for a long time and she was anxious to get there quickly. A few months hence the mails will need only fourteen days for the journey from London to the great cities in the south of Australia. Instead of travelling, as these two women pilots did, at a speed of eighty miles an hour, the mails will be taken in the new Diana air line at a speed of 145 miles an hour.

Four years ago Mrs. Mollison herself might have been dubbed the new Diana, making her conquest with the aid of horse power in the place of the engine. In that time the new Diana air line for the education of the multitude. Her position as the maker of the fastest time for women pilots between England and Australia had stood unchallenged for four years. Now Miss Batten has displaced her by the simple expedient of spending less time on the ground. There was no need to prove that engine and aeroplane would stand such treatment. Mr. C. W. A. Scott and others had driven similar aeroplanes much harder along the same route. Nor was it impossible to find faster aircraft for such a test. The flight clearly was a test mainly of stamina in the pilot, made at the best time of the year for flying and along a route which is nearly ready for the operation of regular mail services.

Such a flight will never lack excuse; but when the new Diana of Imperial Airways has taken up her duties, and is couraging along the route once a week in either direction, solitary flights by accomplished young women will fall into the category of channel swimming and motor racing. Some time in the future the air cruise to Australia may be undertaken in the spirit of holiday rather than of achievement; and when the chase has thus become a procession even the new Diana herself will have been displaced by something still more mechanically efficient.—London Times.

Cat's Revenge On Motorist

Near Klagenfurt, Austria, Peter Sussbauer blared his horn but a prim black cat mewing across the road in front of his car. The cat swelled its tail, arched its back, crouched, hissed, sprang from ground to running, leaped to door to steering wheel, to Peter Sussbauer. Badly scratched and bitten around the neck, Motorist Sussbauer was hospitalized.

THE MARVEL OF MAN

I thought of man, of his strength and his weakness, of his hopes and his fears, of his visions, not to be denied, And his wild heart, unafraid.

O, the marvel of man in his upward climb! Since the birth of earth's dim faith He has toiled with fervor and faith sublime.

And "he draws nearer to truth!"

There are skies climbing to greet the skies. There are conquests of sea and air, And I gloried in man and his victories standing the test of four days.

He has fashioned his life in lofty moods. Has dowered it with beauty and fire, And his toys are fame's trappings and glads and gold.

But love is his heart's desire.

Canadian Hardwood An increase of 100 per cent. in sales of Canadian hardwood to Great Britain for the first three months of this year has been reported.

The figures are placed at 1,206,000 cubic feet this year compared with 604,000 cubic feet during the same period in 1933. Canadian hardwood is being used in increasing quantities in Great Britain for flooring, furniture, and the manufacture of automobile bodies.

Due to curtailment in Canadian lumbering operations and in Newfoundland's lumbering, fishing, and mining, there was a heavy carryover of molasses in Barbados, British West Indies from 1932 to 1933. This year the demand from Canada for fancy molasses has been brisk.

Cookery Parchment brings better, easier, cheaper cooking. Confines odors. Holds full flavours of meats, fish and vegetables. Inexpensive. Each sheet can be used over and over. All dealers, or write direct to

Manchurian Army Japanese Officials Find They Have More Soldiers Than They Need

The problem of what to do about the Manchurian army, now in the uniforms of the state of Manchukuo, is discussed by the Japanese advisers and administrators of the new government.

In the days of Chinese domination an army of more than 300,000 was maintained. This huge force used up more than 80 per cent. of the budget, and in addition unpaid soldiers and regional commanders levied special taxes, seized food supplies without paying for them, and paid nothing for billeting.

To-day the army of Manchukuo numbers about 125,000 men, and uses up a little more than 30 per cent. of the budget.

In addition—there are more than 50,000 Japanese soldiers in Manchuria, paid and maintained by the Japanese empire.

Originally the Japanese high command in Manchuria figured that the Manchukuo army need not exceed 35,000 to 40,000 men, but the question now is what to do with the extra 85,000 to 90,000 unwanted Manchukuo soldiers. If they are disbanded, as some have been, they return to barracks and subjected to training and discipline, they become restless and a danger. They frequently mutiny. When sent on anti-bandit campaigns they refuse to fight unless intempered, squad for squad, with Japanese soldiers.

Expert With Foils

Hungarian Who Is Naturalized Canadian May Fence At Berlin

A Hungarian baron, now a naturalized Canadian, may carry the Maple Leaf into the 1936 Olympic games at Berlin, according to experts who have watched him perform as a "fencer."

Scion of a famous European house, Baron Wolf von Smerzhing has never forgotten his old love, the blade, and although the foil principle of fencing was different to his Hungarian sabre method he quickly developed under the guidance of George Brand, out-standing fencer in Western Canada.

Partial deafness marred him from joining the Hungarian army so he turned to Canada seven years ago. He found employment on the Hudson Bay Railway and soon became adapted to his new environment. Before leaving the north country he spent some time at training.

Arriving in Winnipeg in 1930 Baron von Smerzhing entered the University of Manitoba where he received his B.A. degree. He attended lectures in the evenings and worked at odd jobs during the day. While attending university, however, the 32-year-old student found time to practice fencing at the Blades' Club, which he organized.

THE RHYMING OPTIMIST

Little Helps For This Week

"If ye fulfill the royal law according to the scriptures, Thou shalt love thy neighbor as thyself, ye do well." James 2:8.

Come children let us go. We travel hand in hand. Each in his brother finds his joy In this wild stranger land. Be strong be quick to rise. The weaker when they fail. Let love and peace and patience bloom In ready help for all.

It is a sad weakness in us after all, that the thought of a man's death hallows him anew to us, as if life were not sacred too, as if it were a light thing to fail in love and reverence to the brother who has to climb the whole toilsome steep with us, and all our tears and tenderness were due to the God whom is spared that hard journey.—George Elliot.

Would we codify the laws that should reign in households, and whose daily transgression annoys us, and degrades our household life, we must learn every day to adorn it with sacrifices. Temperance, courage, love, are made up of the same jewels. Listen to every prompting of honor.—R. W. Emerson.

Canada's Sweet Tooth

Statistics Relating To Candy Show People Eat Plenty

This continent has a sweet tooth, of course, but the modern candy maker both makes attractive sweets—and advertises them well. Candy statistics of the United States show a thirty per cent. rise in consumption over last year. Sales for the first four months of 1934 have been at the rate of \$200,000,000 a year. However, the glamorous year of 1929 showed the United States consuming double that quantity so far as value is concerned. Some of the decline is due to lower prices now. So far as this Dominion's sweet tooth is tilted, there were nineteen million pounds of chocolate confectionery manufactured in Canada in 1932 along with over 12½ million dozen chocolate bars. There were over 44 million pounds of sugar confectionery with 1½ million dozen bars. Besides this the Dominion's sweet tooth is tilted, there were nineteen million pounds of chocolate confectionery manufactured in Canada in 1932 along with over 12½ million dozen chocolate bars. There were over 44 million pounds of sugar confectionery with 1½ million dozen bars. Besides this the Dominion's sweet tooth is tilted, there were nineteen million pounds of chocolate confectionery manufactured in Canada in 1932 along with over 12½ million dozen chocolate bars. There were over 44 million pounds of sugar confectionery with 1½ million dozen bars. Besides this the Dominion's sweet tooth is tilted, there were nineteen million pounds of chocolate confectionery manufactured in Canada in 1932 along with over 12½ million dozen chocolate bars. There were over 44 million pounds of sugar confection

Personal and Local

Coleman people visiting the Calgary Stampede this week are: Mr. and Mrs. E. Peet; Mrs. A. Graham and son; John Jackson; Clarence Hoffman; Mrs. A. Jones; Margaret Allan and brother Jim.

Mrs. Robert Parry of Calgary was a visitor at the home of her son during the week.

Mrs. M. Dimmer and son Bobbie, of Trochu, Alta., were the guests of Mr. and Mrs. T. Holstead for a few days.

Mrs. J. Emmerson was a patient in the local hospital this week.

Mr. and Mrs. S. W. Chahley and children are spending a few days at Calgary and Edmonton.

Mr. and Mrs. H. L. Perry of Vancouver, called on Mr. and Mrs. W. L. Rippon on their way to visit relatives at Hawarden, Sask.

Hubert Clark of the Bank of Commerce staff, Taber, was a recent visitor at the home of his parents, Mr. and Mrs. H. W. Clark.

Mr. and Mrs. Fred Antrabus and daughter Freda will leave Sunday for Vancouver. They expect to return July 27.

Mr. and Mrs. Charles J. Steffler of Moose Jaw were guests of Mr. and Mrs. H. T. Halliwell for several days.

Mr. and Mrs. J. A. McLeod and C. Devine motored to Waterton on Wednesday afternoon to visit the Boy Scouts camp.

Tom Malshoff, Nelson tennis champion, and friend motored through town last night for Edmonton where they will take part in the provincial tournament.

Mrs. A. B. Westworth and Arthur will spend two weeks at McBain's lake. Miss Ethel Wilson will also leave on Friday to spend part of her vacation at McBain's.

Miss A. Yuill will leave on Sunday for California to spend the balance of the mid-summer school vacation, after spending ten days in camp with the Girl Guides, of which she is captain.

Mrs. Chalmers, Mrs. Geo. Reid and son, and Jim Chambers, accompanied by Mrs. Wheatley left for the latter's home in Banff on Sunday. They will stop over in Calgary and witness part of the stampee.

32 people travelling by bus, returning from Calgary to Spokane, stayed at the Coleman and Grand Union hotels on Tuesday night. They were members of The Church of the Truth, on a tour of the Rockies.

The Girl Guides camp at McBain's lake was visited by a number of Coleman people during the week-end. On Sunday Mr. and Mrs. A. B. Westworth and party, Mr. John Huxton and sons and Mr. and Mrs. G. A. Brown, and Mrs. Jack Devine spent an enjoyable day there. On Monday Mr. and Mrs. H. T. Halliwell, Mr. and Mrs. C. J. Steffler and Mr. T. Holstead visited the camp.

Mrs. M. Clifford, of the public school staff, is spending her vacation in Edmonton and Grand Prairie. One of the early settlers in Grand Prairie district, Mrs. Clifford has many interesting reminiscences of early settlement of that vast region which is really a province within a province, and during her vacation will visit some of the old friends whom she first met on coming from Ontario to the Peace River district. Since 1927 she has been a very capable teacher in charge of junior grades.

Tennis Tournament

(Continued from Page 1)
tion. After the presentation Mr. White made a plea for a good entry from Coleman in the southern Alberta tournament to be held in Lethbridge this month.

The players and committee were then invited to the home of Mr. and Mrs. Lindoe where a delightful lunch was served.

Many Coleman people took advantage of viewing the Baer Carver's fight pictures shown in Cole's theatre at Bellevue this week.
